PLUNKETS RUCE NUMBER SIX The more we reflect upon the defense of pears. Admit that it is true and the advice o burn Memphis to the ground, contained in the letter we publish on our second page to- sood that the bankers will take fifteen million day, would follow as a natural result. If cotton in any condition is to be brought under so on in any condition is to be brought under so still retains his control of the New York Central. Mr. Field controls the Wabash, of merchandise? And if all the merchan-dize in an infected city is to be put under the held, and Mr. Pierrepont will represent the f merchandise? And if all the merchanban as unmerchantable, why not the houseold furniture and effects and the dwellings and stores of the people? Follow Plunket's in the New York Central, the Michigan Central to its ultimate conclusion and Memphis and all that it contained of goods and chattels should have been destroyed at This is of course absurd. The enement of even the most rigid quarantine loes not contemplate any such folly. It has eference only to infected goods; chattels and that is, goods of any description that have een used by, been in contact with, or been this, it is expected the quarantine officers to them, and they hauled themselves on tationed in the infected city will take cognizance and provide for by careful disinfection or by total destruction, if need be. Cases are on record-many of them-and well authenticated, where the vicus of yellow-fever had been carried in clothing and in carpets

act with the rick and dead for a length of But there is not, as Dr. Plunket admits, a single case on record where yellow fever or any other disease had been carried that had not been in contact with persons suffering from such disease. Were that the case, every city that has been cursed by epidemic disease would have suffered irreparable loss, and the announcement of even a single case o yellow-fever, cholera, scarletfever, diphtheria, meningitis or smallpox, would be the signal for a general confligration. Dr. Plunket's position is absurd, illogical and untenable. His attempt to establish a kinship between yellow-fever and the black plague of the east is not any more so, if the testimony of the best medical writers is to be accepted. And the case which he cites, where, in England, under which he cites, where, in Eagland, under rules established by an order in council, cotton from Egypt was ordered to be opened be temporarily withheld, but whenever a case and exposed, proves that it is. Had this cotton been infected, the laborers engaged in the work of opening the bales so that the heart of each might be exposed to atmospheric influences, would certainly have been inoculated with a disease that history tells us was in

LEADVILLE.

Denver, Col., November 26.—An important case, involving in its results the title to all the property upon which Leadville stands, was decided by Judge Hallett in the United States district court to-day. The title to the land upon which the town stands, and suburbs, was derived through patents from the United States government for placer mining. The ground case was the St. Louis smelting and refining company vs. Thomas Kemp et al., brought by the company to recover the lease which was purchased from the patentee, Thomas Stow, by the company, and which had been taken by the company, and which had been taken possession of by the defendants. The court decided the patent void, on the ground that it appeared from the evidence that the patentee's tract of placer mining ground was composed of several different placer claims, which had been purchased. It did not appear in the proceedings that he had made as many fufficent applications, had as many runnings made by the surveyor-general, posted as many different potices, or done five costed as many different notices, or done five hundred dellars worth of work in all the different claims which had been conveyed to him, constitut-ing the tract included in the patent. The case of the lottery agents vs. the post-master-general, in which complainants seek an irjunction to restrain the enforcement of the recent order of the postoffice department o day. Chief Justice Carter said the court had decided, after due reflection, to remand the case to the equity court, where proceedings were originally instituted, and where a proper order would be made; the case would then be said to come up regularly to the court en bance, and if the parties interested should desire to carry it to the United States supreme court, the district supreme court in general terms would expedite as far as possible. Subsequently the counsel for complainant obtained an order in equity, the court certifying the case to the supreme court, in general terms, and fixing Thursday, of next week for a hearing.

Cotton Exchange:

Gentlemen—We, the undersigned, being now engaged in soliciting stock subscriptions to the Hatchie river transportation company, deem it not only politic, but most important, both to the interest of the transportation company) and the trade of Memphis, that the enterprise should be undertaken under the auspices of and with the indorsement of the Memphis cotton exchange. Two weeks hence the draw-bridge, with which the Memphis and Louisville railroad will span Hatchie river, will be completed, and the free passage of steamers to and fro admitted. The river itself, though not yet cleared has plenty of water, and is in good boating condition. We have a suitable boat selected and kargained for, and fifty thousand bales of cotton now await transportation to Memphis through this outlet. The merchants throughout all the country bordering on and tributary to Hatchie have pledged themselves to support the line, not only by patronage, but by moral and perunlary indorsement, and we herewith file their signed agreement to this effect as an exhibit to this memorial. It is useless to tell you that opening of Hatchie river and the inauguration of this line will reduce freights on cutton and merchandise from all points accessible to our boats and this market at least fifty per cent, and will open up a new and itch field of commerce and traffic to the energy and enterprise of Memphis merchants. We, therefore, call upon you to ald us in our undertaking and to subscribe—each and all of you—for a moderate amount of the stock. As will be seen by our subscription list, the amount of stock to be secured is only fifteen thousand dollars, which will be ample for all the requirements of the trade; fifty per cent of this amount to be raised at once, the balance whenever called for by the board of directors. So soon as the amount to the capital stock is raised the company will apply for a charter and at once commence active operations. and Irritations. The testimonials of permanent cures of Skin and Scalp Diseases which have been the torture of a lifetime, by the Cuticura Remedies, are more wonderful than any ever Lefore performed by any methods or remedies known to the medical profession.

Outicura Resolvent, a powerful Blood Purifier, is the only puritying agent which finds its way into the circulating fluid and thence through the oil and sweat glands to the surface of the skin, thus destroying the poisonous elements with which these vessels have been daily charged.

Outicura, The Great Skin Cure, applied externally, arrests all unnatural or morbid growths which cover the surface of the diseased glands and tubes with Scaly, itching and Irritating Humors, speedily it removes them, leaving the pores open, healthy and free from diseased particles of matter.

Thus internally and externally do these great remedies act in conjunction, performing circs that have astonished the most noted physicians of the day.

Messes. Weeks & Potter.—Gentlemen: I have been a great sufferer with Sait Rheum for thirty rears, commencing in my head and face and extending over the greater part of my body. I have taken gallons of medicines for the blood of different kinds and tried good physicians, all of which did me no good, and I came to the conclusion that I could not be cured. But a friend called my attention to an article in the Union on skin diseases, and I got a box of Outinurs. The first application was a great relief, and the third took the scales all off, and I felt like a new man. I have used three 50 cent boxes, and my skin is smooth and I consider myself entirely cured. Hoping that this may be seen by some one afflicted as I have been (if there is any) is my earnest wish. And I cheerfully recommend it to all persons afflicted with like diseases.

We would call the attention of the trade generally to our well-krown brand of Lard and Lard Oil. Some unseruputous manufacturers, unable to compete fairly with us, are placing upon the market Lard packed short weight, both Therees and stuckets. We especially call the attention of consumers to the above facts. Oilst Lard is always FULL WEIGHT. Weak that we be sustained in our efforts to keep honest goods in the market. Let fraud be stamped out.
